## Doubly Stochastic Poisson Processes

**doubly stochastic poisson processes - university of calgary** - where  $j$  is an independent compound poisson process with intensity  $\lambda_j$  and i.i.d. jump size  $\sim f$  and  $>0$  a.s. jonathan chavez (university of calgary) doubly stochastic poisson processes 18/05/2016 2 / 5 **doubly stochastic poisson process and the pricing of ...** - the doubly stochastic poisson process provides flexibility by letting the intensity not only depend on time but also allowing it to be a stochastic process. therefore the doubly stochastic poisson process can be viewed as a two step randomisation procedure. a process  $a$ , is used to generate another process  $n$ , by acting as its intensity. **arxiv:1109.2884v2 [math] 14 sep 2011** - the doubly stochastic poisson processes (dspps) were introduced by cox (1955) by allowing the intensity of the poisson process to be described by a positive random variable and not just a deterministic function. the aim of such a generalization was to allow the dynamic of a process that is exogenous to **on doubly stochastic poisson processes** - on doubly stochastic poisson processes by j. f. c. kingman pembroke college, cambridge (received 30 january 1964) the class of stationary point processes known as 'doubly stochastic poisson processes' was introduced by cox (2) and has been studied in detail by bartlett (1). it is not clear **doubly stochastic poisson processes with affine intensities** - the doubly stochastic poisson process (dspp) with intensity process  $\lambda(t)$  is a point process  $n_t, t \geq 0$ , satisfying the following property.  $\forall t > 0$ , points **doubly stochastic poisson pulse model for fine-scale rainfall** - stochastic point process model based on a class of doubly stochastic poisson processes is proposed to analyse fine-scale point rainfall time series. in this model, rain cells arrive according to a doubly stochastic poisson process whose arrival rate is determined by a finite-state markov chain. each rain cell has a random lifetime. during the **forecasting a class of doubly stochastic poisson process.** - 508 the doubly stochastic poisson process (dspp) is a generalization of the poisson process when the intensity of the occurrence of the points is influ- **a doubly stochastic point process model for modeling ...** - 12 the doubly stochastic model, which is also often referred as cox process (2), might offer 13 a solution to the some of the current issues faced in crash risk modeling. cox process is an 14 extension of poisson process model where the intensity function of the poisson process is 15 modeled as a realization of a random field (3). one popular ... **application of a doubly stochastic poisson model to the ...** - doubly-stochastic poisson process. doubly-stochastic poisson processes the spatial distribution of  $u(x)$  can be described as a realization of a spatial random function generated by a poisson process. poisson processes have traditionally been invoked to describe the number of independent events occurring within a specified unit of time or distance ... **reflected discontinuous backward doubly stochastic ...** - reflected discontinuous doubly stochastic des with poisson jumps 74 backward doubly stochastic differential equations (rbd-sdes) with one continuous barrier and uniformly lipschitz coefficients. the existence of a maximal and a minimal solution for rbd-sdes with continuous generator is also established. in this paper, we study the now well-know ...
